DETAILED ACTION

Response to Amendment

In regards to the merits of Baughman et al (US 5,387,314) in the previous Final Rejection filed 3/12/2007, the applicants argument that Baughman does not teach the feature that the forming a plurality of chamber walls over the substrate, wherein ones of the plurality of chamber walls separating one pairs of resistive heater elements from another pair of resistive heater elements have been found to be persuasive.

Accordingly, the previous Final Rejection has been withdrawn.

Accordingly, claims 34-53 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
